

FINAL EXAM POLICY

March 11, 2019

You can bring one page of note (double-sided) on a 8.5×11 inches piece of paper for the final exam. The note could be hand-written or printed. Because of this, there will be no hand-out sheet of formulas. You should write down the formula you need on your note sheet. Calculator is still not allowed during the exam.

Please be reminded that the final exam is accumulative. All the topics are listed in the schedule posted on the course webpage. A good resource for preparation is the homework assignment. You are recommended to go over them carefully and make sure you can do them on your own.

For the tables in the appendix of the textbook, you will need the follows:

Table A: 1-16, 19, 20.

Table D: 1-6, 9.

Table E: 1-7, 9.

Table F: 1-16, 21.
